Your Factory of Aerosol

## PTFE Lubricant:

It creates a lubricating transparent film that prevents dirt from depositing. Particularly suited for the lubrication of parts subjected to high pressure. It prevents rubber parts from freezing and corrosion by salt water. It prevents short-circuits and malfunctions caused by humidity in electrical conductors. It eliminates squeaking, water repellent, and silicone-free. It also facilitates the insertion of cables and cords inside sheathes. Commonly used for the maintenance of tools, gaskets and seals, door hinges and locks. High temperature resistant (250°C/482°F).

Available in one format:

- L050 – 400 ml spray can

### Technical Specifications:

Aspect	Tin-Plate can containing under pressure fluid
Color	Light white
Odour	Characteristic of solvent
Relative density	at 20°C 0,62 + 0,66 g/ml
Flash point	Und. 0° C extremely flammable
Pressure at 20°C	4/6 bar
Melting point	ASTM D4591 deg C 334,70
PTFE Aver. particle size	INTERN micron 3,0 +/- 2
Specific gravity	ASTM D4894 g/cm³ 2,18 +/- 0,05
Melting point PTFE	327°C > 340 °C
Maximum temperature	400°C (peaks)
