SPRAY

Cod. S152

Cod. S151

Cod. S155

Multipurpose unlocking:

A penetrating synthetic fluid with a high solvent and releasing power. It supports the releasing process of bolts, joints, threads, hinges and all other mechanical parts from rust and oxidation. It also leaves a long lasting waterproof and water repellent protective film.

Available in 3 formats:

- S152 – 400 ml spray can
- S151 – 200 ml spray can
- S155 – 5 lt tank

Technical Specifications:

Aspect	Tin-Plate can containing under pressure fluid
Color	Light brown
Odour	Characteristic of solvent
Relative density	at 20°C 0,68 ÷ 0,72 g/ml
Flash point	Und .0° C extremely flammable
Pressure at 20°C	4/6 bar
Melting/freezing point	< -66°C (liquid base)
Boiling point	Around 176°C (liquid base)
Vapor tension	> 5 bar (20°C)
Viscosity	< 1 cSt - 9 cSt 40°C (oily base)
Solubility	Insoluble in water
Operating temperature	-50°C / +130 °C c.a.
Flash point	40 °C (liquid base)
