

Nautical lithium grease (G003)

Lubricant spray specific for the nautical sector, perfect for situations with high presence of salt and with aggressive and corrosive agents. The product operates with high temperature and also with low temperature.

HOW TO USE: shake and spray directly on the surface from a distance of 15 – 25 cm. The product could be sprayed also with straw (posted in a multi straw cap).

Quantity	400 ml
Barcode	EAN13: 8034108890029
Confection	12 pz

NAUTICAL LITHIUM GREASE – This grease contains lithium and titanium oxides that make it specific and particularly suitable for the nautical sector, with excellent long-term lubricating effects even in the presence of saline and aggressive atmospheres. It has long-term stability and resists oxidation, protecting surfaces from corrosive agents and is perfectly effective both at high temperatures (220°C) and low temperatures (-40°C). Excellent for lubricating pins, joints, transmissions, levers, suspensions, hinges and exposed machine parts on outboard motors and boats.

Technical Specifications:

Aspect	Cylinder containing under pressure fluid
Color	Creamy white
Odour	Characteristic of solvent
Relative density	at 20°C 0,64 ÷ 0,68 g/ml
Flash point	Low. 0° C
Pressure at 20°C	4/6 bar
Consistency	NLGI EP2
Penetration at 25°C 0.1 mm	265 - 295
Drip point	+ 190 °C
Application temperature	- 40°C - + 220°C

MODALITY OF STORAGE

Before using: stock the product in a dry location and don't stock it with a temperature under zero degrees and over 45°C, after the use, keep containers closed. In the original package, the product can be conserved for 24 months.

After the first usage: conserve in a fresh and dry location, away from heat source. Keep out of reach of children.

Hazards identification:

H222	Extremely flammable aerosol.
H229	Pressurized container: may burst if heated.
H315	Causes skin irritation.
H336	May cause drowsiness or dizziness
H411	Toxic to aquatic life with long lasting effects
