SPRAY

## Chrome/Mirror Zinc:

A single-component cold galvanizer formulated with synthetic resins and aluminum that makes it particularly light-colored and shiny. Ideal for finishing where a shiny and mirror-like surface is required. It gives the surface treated good resistance against weathering. It dries rapidly, permitting the surface treated to be worked after just 15 minutes. Suggested for use on all galvanized parts, gates, gutters, etc. Even on coarse iron surfaces that must be protected and given a particularly bright shine. Suitable for retouching the galvanized/electrolyte zinc.

Available in one format:

- Z361 – 400 ml spray can

### Technical Specifications:

Quantity	400 ml
Box / Case	12 pcs
Barcode	EAN 13 8034108898827
Aspect	Tin-Plate can containing under pressure fluid
Physical state	Pigment liquid in aerosol
Flash point	Und. 0° C extremely flammable
Pressure at 20°C	at 20° 5,5 bar
Relative density	at 20°C 0,71 ± 0,75 g/ml
Propellant	LPG
Chemical nature	synthetic resin and aluminium paste
Color	Chrome silver
Odour	Characteristic of solvent
% Metal in dry film	38 %
Temperature Resistance	250 °C (peaks 300 °C)
Yield	2/3 mq2
Drying time	Out dust 15 minutes
	Dry to touch: 30 minutes
	Dry in depth: 12 hours
